Created many projects and websites that are responsive to all screens , created a personal website to display these works professionally. Skilled in : Html, Css, js, Bootstrap , jquery , Github

WORK EXPERIENCE

Trainee

Udemy

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript.
- Implemented front-end functionality using frameworks such as React or Angular, ensuring high performance and scalability.
- Collaborated closely with designers to translate wireframes and mockups into pixel-perfect web pages.
- Ensured cross-browser compatibility and optimized website performance for improved user experience.
- Conducted code reviews, identified areas for improvement, and implemented best practices to enhance code quality.
- Worked collaboratively with backend developers to integrate front-end interfaces with server-side functionality.
- Assisted in troubleshooting and resolving front-end bugs and issues to ensure smooth website performance.
- Actively participated in team meetings, providing input and suggestions for improving the development process.

The essence and development of websites easily and quickly. "Bootstrap" This course focused on learning the famous framework and how to use it in designing and developing websites quickly and effectively.

During the course, you learned the essentials for using Bootstrap, including the Grid System, Buttons, Forms, Navigation, and other common components. The content is presented in a simplified and organized manner, with practical examples and exercises to apply the concepts studied.
